

## Technical Data Sheet.

# Permafleet® HS Primer Surfacer 5520

### Versatile, stable 2K HS primer surfacer for commercial vehicles

Permafleet HS Primer Surfacer 5520 is a 2K product based on acrylic resins developed to meet the specific needs of commercial vehicle manufacturing.

- Offers good vertical stability.
- Enables easy application.
- Is suitable for use in wet-on-wet processes and as a sanding surfacer.
- Provides good topcoat holdout.

For professional use only!

An Axalta Coating Systems Brand

# Permafleet® HS Primer Surfacer 5520

## Product preparation - application STANDARD SANDING

It is strongly recommended to use appropriate personal protection equipment during application to avoid respiratory, skin and eye irritation.

Steel, galvanised steel or soft aluminium, sanded and cleaned and coated with Wash Primer  
Coil coated, sanded and cleaned  
Glass fibre reinforced polyester substrates, free of release agents, sanded and cleaned.  
Old or original paintwork well sanded and cleaned.  
Surfaces pretreated with 2K polyester products and then finely sanded and cleaned.  
OEM Primer (e-coat), sanded and cleaned.  
Sandblasted steel (SA 2.5)

Surfacer		Hardener		Reducer	
Volume	Weight	Volume	Weight	Volume	Weight
6	100	1	12	20 - 25 %	14 - 18
5520		3265 *		6110	
		3270 *		6120	
		3275 *		6130	

\* Spray Viscosity DIN4: 20-26 seconds

Pot life at 20°C: 2 hr - 3 hr

	Spray nozzle	Spray pressure	
<b>Compliant</b>	1.4 - 1.6	2 - 2.5 bar	inlet pressure
<b>HVLP</b>	1.4 - 1.6	0.7 bar	atomisation pressure
<b>Membrane pump</b>	1.1	2 - 2.5 bar	atomisation pressure
<b>Membrane pump</b>	1.1	0.8 - 1.2 bar	material pressure
<b>Airmix</b>	0.23 - 0.28	90 - 120 bar	material pressure

see manufacturer's instructions

2 - 3 coats

with intermediate flash-off: 5 min - 10 min  
before bake: 15 min - 30 min

	3265 / 3270 / 3275
<b>60 °C</b>	45 min

P360 - P500

## Products

Permafleet® HS Primer Surfacer 5520

Permafleet® VHS Hardener 3265 fast

Permafleet® VHS Hardener 3270

Permafleet® VHS Hardener 3275 slow

Permafleet® Reducer 6110 fast

Permafleet® Reducer 6120

Permafleet® Reducer 6130 slow

## Product mix

Mixing ratios with special agents are available in the productmix table on Phoenix and in the specific TDS.

The choice of hardener and Reducer should be made according to application temperature and size of repair.

3265	Accelerated fast hardener for small panels or for design work (stripes) 20-25°C.
3270	Standard hardener for all 2K CV products (20-25°C).
3275	Slow hardener for large surfaces and high temperatures (>30°C).
6110	Fast reducer only for small panels/areas (15-20°C).
6120	Standard CV reducer for all CV products. (20 -25°C).
6130	Slow reducer for large surfaces and high temp. (25-30°C), to avoid overspray problems.

50 - 100 µm

### Theoretical coverage

470 - 480 m²/l at 1 micron dry film thickness

Due to different hardener characteristics and different mixing ratios of the ready-to-use mixture in some TDS versions, the theoretical coverage calculation may vary.

Note: The practical material consumption depends on several factors, e.g. geometry of the object, surface formation, application method, spray gun setting, inlet pressure, etc.

Clean after use with a suitable solventbased guncleaner.

## Remarks

- Material has to be at room temperature (18-25°C) before use.
- Surplus ready for use material should not be returned to original can.
- On sandblasted steel the recommended dry film thickness must be measured above the peaks.
- Mix thoroughly by hand before placing the can on mixing machine.
